SCOTTS *Lawn Care* AIDES®

Inst MC-50

Early Spring Program

- 1 *Apply Scotts® Soil Improver* to non-limestone soils. Provides liming treatment plus other valuable soil elements.
- 2 *Turf Builder®* — Early feeding benefits roots that begin to stir long before there is much surface activity. Apply TURF BUILDER — anytime. Frozen ground makes solid footing.
- 3 *Clean off Debris* — Clear the way for early seeding by getting rid of matted leaves that prevent contact of seed with soil.
- 4 *Seeding* — Early seeding is advised — alternate freezing and thawing, melting snow and soaking rain help to imbed the seed.
